Next Talk On Legal Phases Of Marriage

Marital Laws Subject Of Schaefer's Lecture On Thursday

DISCUSSION FRIDAY

Professor Albert A. Schaefer of the Department of Business and Engineering Administration will give the third of eight weekly marriage lectures in Room 10-250 Thursday at 4 and at 5 P.M., when he will discuss "Legal Problems in Marriage."

The question and answer period will be in charge of Professor Schaefer in Room 6-120 at 5 P.M. Friday. At this time solutions will be offered to the various individual problems about the subject treated in the lecture the day before. These discussion periods have met with such widespread approval that the T.C.A. which is sponsoring the lecture series, has decided to make them a permanent part of the program.

Public Ignorant of Marriage Laws

The problems of law arising from marriage are of extreme importance because of the fact that they are not publicized, the general public being in ignorance of the many laws directly affecting marriage. Professor Schaefer

Marriage Lecture

Student Workers Will Have Dance

Bert Williams And Orchestra Are To Play For Walker Assembly Ball

The Walker Assembly Ball for all students working in Walker Memorial will be held on April 14 from 10 P.M. to 3 A.M. Bert Williams and his orchestra, who played last year at the Babson Institute Senior Dance, will furnish the music. The usual rule that only student workers and their guests will be admitted is to be enforced this year.

The committee in charge of the affair is composed of August B. Hunnicke, Jr., '39, chairman; Isaac B. Venable, '39; Philip A. Stoddard, '40; Franklin E. Penn, '40; Jonathan C. Ingersoll, '41; Willard S. Mott, '41; and Gifford Griffin, G.

The party is to be under the direction of Mr. William H. Carlyle and Mr. Albert W. Bridges, managers of the Walker Dining Service.

Jr.

First Fraternities Presented Varied Problems To Founders

To several brave Institute souls, organizing the first fraternities here meant trying a hand at more jobs than were expected.

In the period just preceding the gay nineties Thomas C. DuPont and seven others got together and established one of the first chapters of a national fraternity at Technology. Sigma Chi, founded in 1882, Theta Xi, Alpha Tau Omega, and Delta Psi take the honors as the first houses established at the Institute.

Early Days Unsettled

There was little glamor about these pioneer houses. Meetings were held in hotel rooms. Good business organization was sadly lacking. When, however, Chi Phi opened a chapter in 1890, offering for the first time com-

Dates Lived in the Houses

The big week began with a dinner on Thursday when the young lady guests took over the houses and the members

Fraternities

265 Attend Reception For Foreign Students

Over 48 countries were represented at the reception held for foreign students by President and Mrs. Karl T. Compton last Saturday night. It was the largest gathering of foreign students in the history of the Institute.

Canada had the largest number of representatives, followed closely by China and Siam. Over 265 students attended this annual affair at which dinner was served.

900 People Dance To Larry Clinton At Junior Prom

Dance Starts At 10 P.M. In Imperial Ballroom Of Hotel Statler

Swinging to the rhythm of Larry Clinton and his orchestra, four hundred and fifty couples celebrated at the annual Junior Prom in the Imperial Ballroom of the Hotel Statler last Friday night.

The other undergraduate classes were also represented at the affair. Festivities began at 10:00 P.M. with the receiving line forming from 10:30 to 11:30. During the intermission, from 12:30 to 1:00, Johnny White, young son of a colored dormitory porter and a student at the Boston Conservatory of Music, entertained the assembled group with a few selections on the piano. Dancing was resumed at 1:00 and continued until 3:00 A.M.

Junior Class Bought Up All Options

The event marks the first time in the history of Technology Junior Proms that the sponsoring class has bought up the entire sale of tickets. This broke the previous record set last year, when all the tickets placed on sale to the general public were sold eleven minutes after the sale opened.

A plane flight home enabled President Compton to attend the affair as honorary guest with Mrs. Compton. Chaperones for the affair were Dean Harold E. Lobdell, Professor and Mrs. Leicester F. Hamilton, Mr. and Mrs. Horace S. Ford, Mr. and Mrs. Delbert L. Rhind, and Professor and Mrs. James R. Jack.

Durbin A. Woolford, '39, acted as head usher, supervising the fourteen sophomores who were chosen for the occasion. The fourteen were John A. Livingston, John C. Ingwersen, John M. Klyce, Herman A. Affel, Jr., H. Phillip Williams, William R. Ahrendt, Richard A. Van Tuyl, James S. Thornton, William M. Folberth, Arnold S. Mengel, Warren J. Meyers, Franklin W. Kolk,

David A. Bruck, and Frank G. Miller, Jr.

Spring Dance On March 24

Lee Forest's Orchestra To Play In Walker For Dorms, 5:15 Club

Dormitory men and commuters are cooperating on a spring dance to be held in the Main Hall of Walker Memorial, March 24 from 9:00 P.M. to 2:00 A.M. Lee Forest's orchestra, new to Technology, will furnish the music for the evening.

Tickets may be purchased at the dormitory office or at the 5:15 Club room in Walker Memorial. It is hoped that this event will be the beginning of a closer relationship between the commuters and dormitory men.

Tickets \$1.50 Per Couple

The ticket price has been set by the committee at \$1.50 per couple, according to Harold V. Wallace, '40, chairman of the 5:15 Club committee, and Thurston S. Merriman, '39, chairman of the dorm committee.

Though this will mark the first appearance of the Forest orchestra at a Technology dance, the band is well-known elsewhere and promises to provide music for both the swing addict and the lover of sweet rhythm. The band features a female vocalist and a rhythmic quartette as accompaniment for Lee Forest's special arrangements of the popular song hits.

Dance Is Experiment

This dance is a type of experiment, in that it is the first time the Dormitories and the Commuters have combined to present such an event. According to the committee in charge of arrangements, if this affair proves to be successful, similar ones may be arranged in the future.

Saturday Night Planned For Dorm Victrola Dance

Inaugurating a new form of entertainment with old methods, the first Dorm Victrola Dance will be held Saturday night in North Hall of Walker Memorial. The dance is open to all dormitory residents with admission at twenty-five cents per couple, and no stags will be allowed. Refreshments will be served, and dancing is to last from 8:30 to 12:00.

T.C.A. Embassy To Start Soon

This year's T.C.A. Embassy, to be held April 14, will again make it possible for future engineers to settle any questions that may be bothering them concerning religion's place in the scientist's life. After the introduction by Dean S. C. Prescott, "Religion and Life", the keynote address, will be delivered by Rev. Carl Heath Kopf of the Mount Vernon Church to an open assembly at 5:00 P.M. in Room 6-120.

In the evening, ministers from the Boston area will conduct "Bull Sessions" at the various dormitories and fraternity houses to make possible a clear and frank discussion of this subject. The fraternity committee composed of Peter M. Bernays, '39, chairman; Jackson R. Nichols, '40, and John J. Quinn, '42, has announced that complete participation by all the fraternities will be their goal this year. Last year twenty-three of the twenty-four houses received Ambassadors.

Dr. Kopf will be remembered for his fine work at the baccalaureate ceremonies last year. Rev. Kopf is well acquainted with President Karl T. Compton, having been a pupil of Dr. Compton when he taught at Princeton University.

Hayden Foundation Gives Scholarships Valued At \$50,000

Fund Set Up To Aid Freshmen From Boston

President Karl T. Compton announced last Friday night that the Charles Hayden Foundation has made a grant of \$50,000 for freshman scholarships to Technology. The scholarship fund was established for the purpose of aiding deserving high school students of the city of Boston, particularly those of English High School.

Under the provisions of the grant, as explained by J. Willard Hayden, President of the Foundation, graduates of the Boston English High School, of which his brother, the late Charles Hayden, was an alumnus, will be given preference in the award of scholarship aid.

In Memory of Charles Hayden

In announcing the establishment of the Hayden Scholarships, Dr. Compton said: "The Institute welcomes this opportunity to share in memorializing a distinguished alumnus because the grant is so admirably expressive of Mr. Hayden's desires. It is entirely in line with the Institute's long-standing policy of making a Technology education available to worthy young men who might be denied a college career by lack of funds.

"Young men in the Boston area who are enabled to go to college by this latest benefaction of the Hayden Foundation will doubtless gain inspiration by the fact that they are

Subway Passage, Proposed in Thesis, Would Connect Walker and Building 2

Subway passages which would connect Walker Memorial with Building 2 and Building 2 with Building 1 were conceived by several students scarcely five years after Technology settled in its new home on the Cambridge side of the Charles. In fact, Civil Engineering Senior, A. P. Wilks, '22, believed that the matter was of such immediate importance that tired of braving Boston weather, he devoted his thesis to a study of the situation and even the layout of plans for the construction of such a system. He expressed his apology for taking up the subject thus: "That such a pas-

sageway . . . would be a benefit to those connected with the Institute is self evident to anyone who has been here during a prolonged spell of rain, such as is quite common in this section of the country."

Would Be for Eaters, Exercisers

Wilks felt that the passageway between Building 2 and Walker would be the more serviceable of the two because of the large numbers of students and staff members who lunch at Walker and because of those fresh-

CONGRATULATIONS

Hap Farrell and his Junior Prom Committee are owed the deep gratitude of the Junior Class for one of the most enjoyable and well managed Proms in years.

The wise choice of Larry Clinton's orchestra was demonstrated by the decidedly "super" dance music which swung from the instruments of that aggregation. It was music that was reason for dancing rather than jitter-bugging.

Table seatings and bar facilities were adequate and unobtrusive. The favors distributed were conveniently sized, and in the best of taste.

All in all, it was one thoroughly good dance.

THE CAT ON OUR BACK FENCE

Looking back upon the shining example which was the Junior Prom, Friday night, we are startled to notice what a tinge the presence of VooDoo cast over the occasion. Frankly, from the overdue-burial odor which arose from the previous issue of that thing, we had not believed it capable of any further noticeable effort.

However, VooDoo arose from its shroud, and again vigorously overshot its mark. In our fatherly criticism of its last regular droolings, we endeavored to reassure Phos that it must not take us too seriously. But, like immaturity the world over, Phos knows only extremes.

The alley cat from the attic of Walker accuses us of casting refuse from the garbage can. Judging from the rather raw contents of Phos' Junior Prom exudations, that feline lives in a domicile composed largely of glass, and should be careful as to throwing stones. Although the distinction may not be clear to the cloudy intellect of "Stinky" Phos' there is a dividing line between printing fair and honest criticism, and printing scurrilous humor.

THE OUTWARD ACT

"The outward act or form by which men indicate recognition of a god or gods to whom obedience and honor are due; . . ." That is the first definition which Webster gives for religion. Another definition by the same authority is "devotion, or fidelity, as to a principle or practice; . . ."

If a little liberality in the interpretation of the phrase "god, or gods" is allowed in the first definition, it becomes quite the same as the second definition; and very similar to the definition suggested in a recent issue of this paper. This fact may be construed as a philological justification for our definition.

This, however, is easily the least important justification.

The definition must be warranted upon moral and spiritual grounds. In spite of Webster, religion for millennium has been taken to mean faith in an all-powerful, super-natural Creator, a Father and Guider of mankind. The existence of such a being can be neither affirmed nor denied, positively; it can be only believed or disbelieved in.

However, the belief in a Creator is assumed to imply a belief in a life-after-death for man. Upon that ground we can justify our definition of religion. A belief in life after death is essentially selfish. It implies consideration of the individual more than the race. Surely a creed which preaches salvation of the race through the individual is morally and spiritually superior to one which preaches salvation of the individual through the individual.

SCIENCE IN BRIEF

by ARTHUR M. YORK, '38

FIRE WALKERS

At last a thorough scientific study has been made of the ancient and mystic art of fire-walking. English scientists have found that it is only a matter of knowing and practicing the proper technique, which consists of "rocking" the feet over the coals or bed of hot stones, thus presenting each portion of the feet to the heat for only a short interval of time. Toughness of the feet or technicalities in the construction of the bed of coals or hot stones are not necessary to avoid getting burned. The English scientists took off their shoes and socks, rolled up their trouser legs, and tried the fire-walking themselves. After a few practice trials, they were able to walk unharmed the length of a 10-foot pit of stones the surfaces of which were at a temperature of 1200 degrees, Fahrenheit. Lead melts at 621 degrees. (1)

BETTER THAN SILK

Rayon, which has for many years been successfully imitating silk, now has a competitor by the name of "nylon", which has all the desirable qualities of silk and still other properties that are better. It is an organic substance which can be made into fibres as fine and as soft as silk but stronger and more elastic, and it will take dyes as readily as silk or wool. It is impervious to water and, at high temperatures, softens and melts so that scraps and clippings can be reworked into fibre. (2)

ZIPPER SAUSAGE

A newly developed casing for sausages is stitched up the side and may be "zipped" open and removed by pulling a tab. What is more, use of the zipper casing will increase production capacity by 600 per cent. (4)

For more complete discussion of the above items, consult recent periodicals as follows: (1) Scientific American, March, 1939, p. 125; (2) Technology Review, March, 1939, p. 205; (4) Food Industries, Feb., 1939, p. 78.

THE READER REMARKS

The Editor, The Tech:

It is to be regretted that the editorial board of The Tech allowed itself to be represented by the immature line of reasoning expressed in Tuesday's editorial under the head "Why Chastity?"

The author of this article proposes to set a new set of moral standards to fit the temptations of the day. Would he likewise make it less a crime to steal when times are hard than during prosperity? Does he justify killing his fellowman because, in his narrow judgment, the population is too large?

His inexperience is evident when he speaks of "discreet and controlled" violations of chastity. He probably would advocate bombs that could be "discreet and controlled" in their explosions so as not to harm noncombatants. Perhaps he has not had the depressing experience of visiting one of our institutions for the insane, and determining, case for case, just how pitiful are the effects of violations of chastity, both to the individual and society as a whole. He would lightly dismiss Nature's own severe penalty of sterility for the promiscuous.

No, thousands of volumes have been written to witness the fact that mankind has not yet reached the age where it can throw off the restraining influences of a strict moral code without destroying itself. But each adolescent mind passes through that point in its development where it is confident to disregard the wealth of mankind's experience and cut a path for itself, only to learn, with a sorrowful awakening, that it can't be done.

We trust that in the future you will consider your expressions more maturely before allowing them to be printed in a public column.

WELCOME W. BENDER, JR.

EDITOR'S NOTE:

If Mr. Bender will read carefully the editorial in question, it should be clear to him that no definite proposals were made. It seemed then, and still seems, that the question is one which is open to discussion. An attempt was made to present both sides, with natural emphasis on the moreorthodox one, since so comparatively little has been said on that side.

Reviews and Previews

SYMPHONY HALL—Performing here next Monday night, March 13, is the New York Philharmonic Orchestra with John Barbirolli conducting. Arthur Schnabel will be the soloist, and will play Beethoven's *Emperor Concerto*. The program will include Brahms' *Second Symphony*, the Scherzo from Mendelssohn's *Octette*. There will be no concerts this Friday and Saturday, March 10 and 11, since the Boston Symphony Orchestra will be on tour.

KEITH MEMORIAL—*The Little Princess*, with Shirley Temple, Sybil Jason, and Richard Greene. A technicolor extravaganza, nicely placed for Shirley. On the same program is *The Saint Strikes Back*, with George Sanders.

LOEW'S STATE AND ORPHEUM—*Topper Takes a Trip*, with Constance Bennett and Roland Young. Another amusing epic of ectoplasm. On the same program *Four Girls in White*.

METROPOLITAN—Wallace Beery and Robert Taylor in *Stand Up and Fight*. Also Robert Montgomery and Rosalind Russell in *Fast and Loose*.

KEITH BOSTON—*Thanks for Everything*, with Adolphe Menjou, and Glenda Farrell in *Torchy Gets Her Man*, the most recent in the *Torchy Blaine* series.

PARAMOUNT AND FENWAY—*Tailspin*, with Constance Bennett, Nancy Kelly and Alice Faye. An engaging conjunction of women fliers, Fox films, and Miss Nancy Kelly.

UNIVERSITY—A triple feature program, featuring *They Made Me a Criminal*, with John Garfield; *The Great Man Votes*, with John Barrymore; and Walt Disney's new show, *Ferdinand the Bull*.

SCOLLAY AND MODERN—Tyrone Power and Henry Fonda in *Jesse James*. Also *Woman Doctor*.

UPTOWN—John Garfield and the "Dead End" kids in *They Made Me a Criminal*. Also Paul Lukas in *The Lady Vanishes*.

Glee Club

(Continued from Page 1)

a return concert sometime later in the spring.

The Technology men will sing under the leadership of Henry J. Warren, director of the glee club, while George S. Dunham of Lasell will lead the hundred voices of the Orphean Club. The program will include a group of Finnish songs by M.I.T. and several numbers by the combined groups.

Two Bids to Each Member

Lasting from 10:30 P.M. to 1:00 A.M., the dance will be open by invitation only and two bids were made available to each member of the club for distribution to friends. Kingsbury T. Jackson, '40, is in charge of arrangements for the affair.

Scholarships

(Continued from Page 1)

following in the footsteps of Mr. Charles Hayden."

Hayden Graduated from Technology

Charles Hayden, who was graduated from M.I.T. in 1890, was a life member of the Institute's Corporation and contributed to its endowment. When the Technology Loan Fund was created in 1930, Mr. Hayden became chairman of the loan fund committee, in which position he served until his death two years ago. Under the provisions of his will the Institute received a bequest of \$1,000,000.

In establishing the Hayden Scholarships as a memorial to Mr. Hayden, the Foundation hopes to aid capable young men whose parents are unable to finance the entire cost of their education. In making the awards, the academic records, personal qualifications, and the need for financial assistance of all candidates for the Hayden Scholarships will be considered. In addition to these foregoing qualifications, all candidates must be recommended by the principals of their schools.

Special Examination Required

Applicants will be required to take special qualifying scholarship examinations between May 25 and June 1 of this year. Besides the obvious benefits to be derived by individual applicants for this scholarship aid, it is evident that as a result of the requirements there will be a valuable influx of capable young men to the Institute who will bolster the scholastic standing of future undergraduate classes.

Application for the Hayden Scholarships is open to graduates of high schools in the city of Boston and in the following cities and towns in metropolitan Boston: Arlington, Cambridge (High, Latin and Rindge Technical Schools), Brookline, Chelsea, Dedham, Everett, Medford, Milton, Needham, Newton, Quincy (Quincy High and North Quincy High Schools), Revere, Somerville, Watertown, Winthrop, Belmont, Braintree, Canton, Lexington, Malden, Melrose, Stoneham, Waltham, Wellesley, Weston, Weymouth and Winchester.

MERCHANDISE—SERVICE—PRICES

CREW HITS RIVER

The Tech Crew has been rowing on the river regularly since ice left the basin last week.

Strong Wesleyan Team Overcomes Tech Squashmen

Barton Scores Lone Tech Victory In Connecticut Competition

Last Saturday, the squash team travelled to Wesleyan in an effort to repeat the December 10th 5-0 victory gained on Tech courts. Their efforts were thwarted, however, since the loss of the number one player necessitated the switch of each man to an opponent ordinarily stronger than he. Al Barton, '40, was the lone Tech victor, while Art Arguedas, '41, and Irv Peskoe, '39, each managed to win one game in the 1 defeat.

Next Saturday, the team meets Trinity at Hartford in its last inter-collegiate match of the season. The games will begin at 4 p.m. and line-up will be as follows:

1. Bob Miller, '40; 2. Al Barton, '40; 3. Art Arguedas, '41; 4. Irv Peskoe, '39; 5. Norris Dow, '39.

Fresh Finish Season

The Freshman team dropped a 4-1 match in its final of the season last Friday. Ted Badger was the Tech winner. As for the Freshman record, it followed close to that of previous years, namely 5 individual victories against 50 defeats.

In the Emerson Cup Tournament, Bob Millar, '40, and Seymour Sterns, '39, have survived the second round and are favored in the finals. Bob is playing number one on the varsity since Bill Babcock, last year's winner, has been forced by illness to leave the team and the tournament.

Marriage Lecture

(Continued from Page 1)

ated, "The average person is at a disadvantage when he enters marriage. When a man buys a car he is given a complete list of rules and regulations governing his responsibilities with the car, but when he is married, either the minister nor anyone else outlines the laws governing his actions."

Professor Schaefer's lecture will cover the laws concerning wills, property rights, partnership responsibility, and other personal transactions. The object will not only include the law as related to finance, but also to individual liabilities and rights as they exist under the contract of marriage. He will also outline the laws that govern divorce.

Graduated from Harvard

Graduating from Harvard Law School in 1909, Professor Schaefer is well qualified to talk on this topic. He was admitted to the bar the same year and became assistant to the district attorney of Middlesex county. In 1913 he became the first trial lawyer of Ropes, Gray, Boyden and Perkins, one of the largest law firms in the country, and spent the next twenty years in the courtroom trying every conceivable type of case.

Professor Schaefer came to the Institute as a special lecturer in 1930, and he became the first professor in law and government. The course in law here at Technology was founded by Louis D. Brandeis who recently signed from the United States Supreme Court.

Fencing Team Defeats B.C.; Wins By 16-1

Adelson Stars For Tech As He Wins Foils And Epee

FENCERS STAY ON TOP

The fencing team continued its winning record by trouncing Boston College by the amazing score of 16-1 last Friday night in the Walker Memorial Gym. H. J. "Cap" Adelson, encouraged by the pulchritudinous Junior Prom element in the audience, starred for Tech in both foils and epee.

Adelson, sophomore sensation and veteran of five years' experience in the fencing world, has been one of the mainstays of the team in all three weapons and has continued his record of consistent wins in the No. 1 position in foils and epee. Ed Sherburne, who fences foils and epee, won his three matches in the foils competition, while Bech, substituting for Captain Isbenjian, defeated his competitors, fencing foils in the No. 3 position. Bech and White held down the sabre positions and turned in a 4-0 victory over Luddy and Rooney of B. C. The only defeat suffered by the Varsity was a 14-13 win by Dartmouth, which was probably caused by the fact that Isbenjian was not able to play because of injuries in the shoulder received in the Bowdoin match.

Not only have the Tech swordsmen excelled in collegiate competition, but they have also placed high in the meets held by the New England branch of the Amateur Fencers League of America, which is associated with the A.A.U.: "Cap" Adelson placed second in the individual novice foils and first in the individual novice epee; "Lefty" Isbenjian placed third in the junior foils and epee; Adelson took a second in the novice sabre. The next bout will be the junior team foils. The most important A.F.L.A. meet will be the individual three weapon tournament which is scheduled to take place April 12, and in which Adelson is heavily favored to win.

The high spot in the collegiate competition will be the inter-collegiate meet which will take place in Philadelphia April 1. The original strategy for this meet was to send a small squad and have the members enter more than one competition. Unfortunately a new ruling was received last week which said that only one man would be allowed per weapon. The team now plans to concentrate on foils and leave the sabre and epee to fate.

The freshman team was defeated by a strong Harvard aggregation by the score of 16-11. Menck starred for Tech in the foils, while Hinchman turned in three wins in the epee. Davies won two out of three of the sabre duels, while Telling won the

Wrestlers Lose To Springfield

Stone Wins Fall, Carleton Scores Lone Freshman Mat Decision

Tech wrestlers were defeated 22½ to 11½ by Springfield College last Saturday night at Springfield. "Rockey" Stone, Tech 128 pounder, won the only fall for Tech over Long of Springfield in six minutes, twenty-five seconds with a further arm bar and cross body hold. Fred "Fish" Haddock, substituting for "Beano" Goodman who is still suffering with a strained shoulder he received in the Harvard match, was pinned with a reverse body hold.

The freshman team also suffered defeat from the "Muscle Factory" matmen winning only three points. This freshman meet was the first of the season in which it was necessary for the referee to render a decision. In all previous meets every match had either been won or lost on falls.

Heavy—Kurth of Springfield won by fall over Kram of M.I.T. 3:28.

Subway

(Continued from Page 1)

men required to take calisthenics in the Walker gymnasium.

His plans included accurate drawings of the layout of the two subway passages, specifications for the use of concrete in the walls of the passages, an outer lining of crushed rock to allow the proper drainage of water, and the placing of electric lights.

To Eliminate Puddle-Jumping

Indicating that 1922 was before the day of extensive concrete walks on the Technology campus, Wilks planned for the roofs of the concrete passageways to be level with the surface of the ground so that they could be used for outdoor walks during fair weather thus eliminating puddle jumping between Walker and Building 2 and replacing the walk between Building 1 and Building 2. He specified that the walk across the great court could be placed in either of two places between the buildings at the points nearest Memorial Drive or back at the points where Buildings 1 and 2 join Buildings 3 and 4 respectively.

Fencing

(Continued from Page 3)

only other sabre match. The team won the epee 5-4 and lost the sabre and foils 6-3. Summary of the B.C. Varsity match:

Foil — Adelson (M.I.T.) defeated Riley, Struzziero and McGrath. Sherburne (M.I.T.) defeated Riley, Struzziero, and McGrath. Bech (M.I.T.) defeated Riley, Struzziero, and McGrath.

Epee — Adelson (M.I.T.) defeated Gai. Shaller defeated Rooney and Gai. Rooney (B.C.) defeated Adelson.

Sabre — Bech (M.I.T.) defeated Luddy and Rooney. White (M.I.T.) defeated Luddy and Rooney.

Fraternities

(Continued from Page 1)

lived elsewhere. Performances by the Institute Musical Clubs and the Drama Club followed. Track and field athletes in the annual spring meet also gave their best efforts to please the feminine throng.

The Junior Prom was, of course, the climax of the week. The beauties of that day and their Junior escorts may not have had Larry Clinton to play for them, but unquestionably they "swung out" in the accepted manner of the time.

House Dances Saturday Nights

Saturday morning was usually a time of rest, except in 1911 when Technology's crew rowed its first inter-collegiate race. Records from that time have it that the U. S. Naval Academy really had to bend their backs to beat the Institute by two boat lengths. Saturday night each chapter held its house dance, attended principally by members of the individual house. Elaborate decorations and excellent punch were always in order at these affairs.

Ladies'-Men In Houses

It seems also that the early Tech fraternities provided a good share of

the ladies'-men around Boston. At the time these gentlemen were known as "fussers". The most conspicuous boy in this class were those who possessed "horseless carriages." Tradition has it, furthermore, that the pioneer fraternities also provided their share of these strange vehicles of a bygone era.

A Combination that Satisfies with a Capital "S"

Radio City's world-famous "Rockettes" and CHESTERFIELDS
...two can't-be-copied combinations

There's skill and precision in the way the Rockettes dance and there's skill and precision in the way the mild ripe Chesterfield tobaccos are blended and proportioned to bring out the best in each.

That's why Chesterfields are milder and taste better . . . that's why they'll give you more pleasure than any cigarette you ever smoked.
